## Nutrition Goals

Setting goals to improve your eating habits is a great way to eat healthier. An example of a positive nutrition goal is, "I will add 1 cup of berries to breakfast and a small apple or orange as an afternoon snack at least five days this week."

**Specific** - What specific food would you like to add/change?

**Measurable** - How much or how many will you add or change?

**Attainable** - Do you have what it takes to follow through?

**Realistic** - What can you do? (improvement over perfection)

**Time-Connected** - How often or for how long will you make this change?
